**Instructions and  
Warranty Information**

Dear Enthusiast,

**THANK YOU** for purchasing the Monster Power® Digital PowerCenter 700. The MDP 700 reflects our commitment to providing innovative and practical solutions to protect your home theater, AV electronics, and computer equipment.

Today's AV and computer electronics, from HDTVs and DVD players, to modems, printers and more, all use extremely delicate digital microprocessors. Common power surges and spikes can easily damage sensitive digital circuitry in computers and AV components. Even worse, they can corrupt or destroy valuable data like digital photos, music, videos, and important documents.

Ordinary surge protectors have a limited surge absorption capacity, if a powerful surge exceeds that fixed capacity, any equipment is vulnerable to damage or even destruction.

For advanced protection against more powerful surges, Monster® Dual Mode Plus™ automatically disconnects to protect your valuable equipment and data from dangerous power conditions. Dual Mode Plus then sounds an alarm to alert you that it has protected your system from damage.

## TROUBLESHOOTING

Symptom	Possible Cause	Remedy
<p>The PowerCenter is not receiving power.</p>	<p>The PowerCenter is not turned On.</p> <p>Too many devices are connected, causing an overload, tripping the Circuit Breaker.</p>	<ul style="list-style-type: none"><li>• Turn the PowerCenter switch on.</li><li>• Make sure the PowerCenter's AC power plug is plugged into a properly grounded 120 volts (nominal) wall outlet.</li><li>• In some households, a wall switch may need to be thrown to make the wall plug active. Try turning on the light switches located near the wall unit.</li><li>• Press the PowerCenter main power switch to "OFF" and then again to "ON" to reset.</li></ul>

<b>Symptom</b>	<b>Possible Cause</b>	<b>Remedy</b>
Speakers emit a humming or buzzing noise.	The PowerCenter is sharing AC power with equipment that is not properly grounded.	<ul style="list-style-type: none"> <li>• Connect your PowerCenter to a dedicated outlet.</li> <li>• Try unplugging different components from the PowerCenter one at a time to see if the noise stops.</li> <li>• Make sure all components are plugged into PowerCenter.</li> </ul>
Alarm beeps continuously.	The PowerCenter protection circuitry has sacrificed itself to protect connected equipment from a catastrophic surge.	The PowerCenter must be replaced. See the Warranty Information section for important details.
"Ground OK" Diagnostic Indicator Light does not come on.	Make sure PowerCenter is plugged into grounded outlet.	Contact a qualified electrician to check outlet(s) for proper grounding.
